 RE: **Situational Update –Level 1 Minimal-** Operational Period 33 (05/20/21 – 06/30/21)

Overall Community Risk	Disease Situation	Hospital Capacity	Public Health Capacity
Level 1b - Minimal	The community continues to experience consistent positive case activity and community spread is present. Variants are present. Vaccine is available.	The hospital case load is stable.	Contact tracing is stable.

The Complete CBJ COVID-19 Dashboard can be found [here](#) or by going to [Juneau.org/ COVID-19](http://Juneau.org/COVID-19)

Situation Assessment: 14 day and 7 day case rates have dropped to the minimal alert level. The community continues to see COVID spread in the community with a higher proportion of cases occurring in youth under the age of 19. Two variants of concern have been identified in Juneau - (UK/B1.1.7 and Brazil/P1). Case rates statewide are declining.

Issues of Note:

We had a full unified command meeting today.

BRH reports they have discharged a longer term COVID patient and that they continue to track and monitor COVID impact on pediatric patients. They are working through visitation policies to adjust for the lower level of risk in the community, continue to refine physical plant adjustments made due to COVID, and they report that the testing lab and processes are working well, though some minor testing equipment adjustments have been necessary. In addition to processing community tests, they also have several commercial accounts for test processing.

JSD reports that the regular school year is complete and that the first session of summer school begins on June 1st. They will continue to monitor and adjust protocols as recommended by the CDC for school settings.

Daily Numbers Report: We are reporting 5 new cases today (Monday 1:00 pm – Wednesday 1:00 pm).

COVID-19 In Juneau				
	Active	Recovered	Deceased	Cumulative
Resident	8	1,320	5	1,333
Nonresident	0	161	0	161
Total	8	1,481	5	1,494

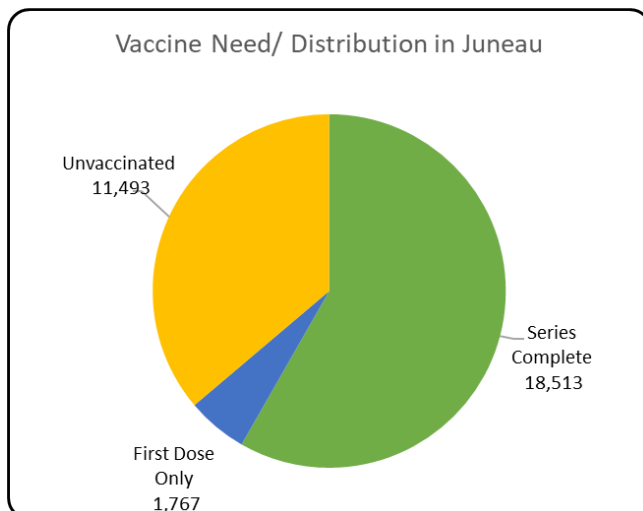

Note: CBJ EOC data may differ from the data reported on the State of Alaska dashboard.

Disease Transmission/Contact Tracing:

We are reporting 5 new resident cases and no new nonresident cases. 2 cases are secondary infection and the remaining 3 cases are under investigation. The private party cluster has 9 positive cases with 9 people recovered. The cluster is considered closed.

That State is reporting 68 new cases today bringing the statewide total to 70,119 cases. This is a total of 120 new cases since the last EOC report.

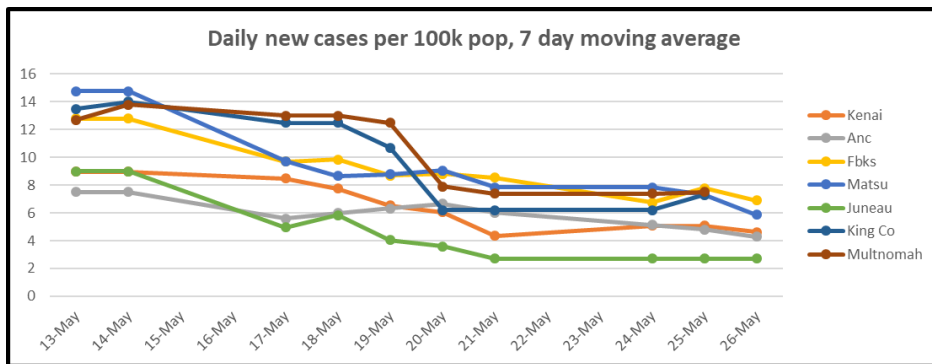

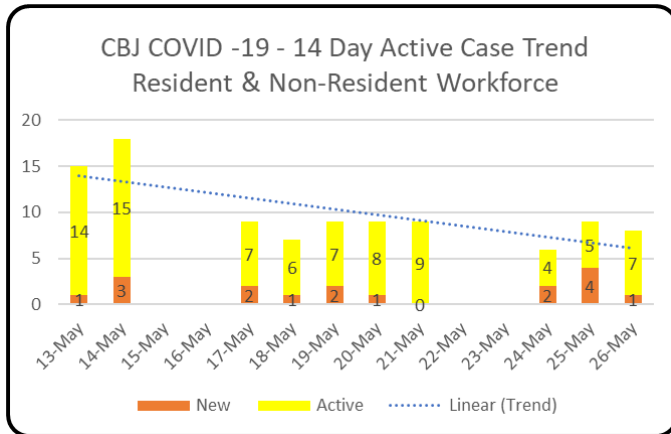

Testing: 177 COVID tests were processed at BRH since the last EOC report, all tests returned in less than 24 hours.

Total: **63.8%** of the of the total population of Juneau has received at least 1 dose of vaccine and **58.3%** have completed their vaccine series.

12+: **74.4%** of the age eligible Juneau population has received at least 1 dose of vaccine. **67.9%** have completed their vaccine series.

65+: **94.8%** of this age group has at least one dose of vaccine. **91.8%** have completed the vaccine series.

This chart tracks the number of new cases in the past 7 days, controlled for population. King County (Seattle) and Multnomah County (Portland) are included for context and due to travel frequency. The source data for Alaska is from the SOA dashboard. Out of state data is from the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and generally lags a day behind most of our other reporting. Policy recommendations at varying levels (<1, <10, <25, 25+) can be found on their website
