CLARIFICATION:

Question: Can Capital Transit please confirm whether it has modems on all buses? If so, can Capital Transit provide the specifications of these modems and can Capital Transit confirm whether there are available ethernet sockets in these modems?

Response: Existing devices do not have an open Ethernet port. These devices need to be replaced to facilitate a planned February 2022 3G technology phase out on AT&T's cellular network. Depending on the RFP award and timing of implementation, the CPU/Modem may be replaced through the chosen AFC/APC suppliers or through our existing AVL supplier.
