APL20140162	5/13/2014 per appeal; appellant believes that the property value has been decreased due to the installation of a cell phone tower with a blinking light that is in her view shed. Upon review of all available sales information the Assessor's office did not find any evidence that there was a decrease in the market value of the appellant's land for any reason including but not limited to the installation of the cell tower. A letter was sent to the appellant on May 13, 2014 by mail, certified mail and email stating that there was no basis for adjustment. Appellant was advised to reply on or before May 23, 2014 or it would be presumed that she had withdrawn her appeal. Appraiser, Mary Grant visited the property as part of the 2014 canvass at which time the appellant stated that she had read the email the previous day and that she would be working to find evidence for next year's appeal period. Appellant did not want an interior inspection of the property.	WITHDRAWN	04/22/2014

FDP2007-00034	Burning of sage, tobacco during opening and closing ceremonies for the Native Aspirations Community Meeting on September 11-13, 2007 in the ballrooms of Centennial Hall. In addition there will be a spirit house in the Miller room for Native Americans can smoke, meditate or pray during break times. The sage would be used during the opening and closing ceremonies each day. Generally we will use a light ball of sage about the size of a ping pong ball and place it in an abalone shell with another abalone shell underneath and place it on a blanket on the ground or on a table in the center of the room. The two shells protect the blanket from getting too hot. I may also use my eagle feather fan and walk around the room and wave the fan over the smoke and brush it towards individuals to allow the smoke to cleanse and purify their surroundings. We might also use a braid of sweet grass, pinches of cedar and or tobacco and burn it in the same manner. If we have an opening ceremony sage coul	ISSUED	08/23/2007

APL20140156	4/24/14 Per appeal: Exterior insp. Site has easements and egress/utility shared use est at 21% of total site. That portion is est 25% good. Building value was recalculated. Changes as follow: Chg site from 577,800 to 486,200. Chg Bldg from 241,000 to 200,500. Chg AV from 818,800 to 686,700 jcs	CLOSE	04/22/2014
APL20160461	5/18/16 Per appeal. Issues raised by appellant are basically the same as in 2005 and 2014. Reviewed the CDD file, as-built survey from 1979 showing easements. Reviewed and recalculated building. Also checked standards used in the valuation of the other buildings on the block. Based upon the exterior condition of the rear and side of the subject, the "oldest" eff. year built of the neighboring 11 bldgs was applied which lowered the building value. Recalculated access/egress easement and included portion of the rear of the lot that is not developed. Estimated site overall is ~84% good, reducing rate from 125 PSF to 105 PSF. N/C to site. N/C to Land @ 486,200 Chg Bldg from 186,900 to 149,100 Chg AV from 673,100 to 635,300	CLOSE	04/19/2016

APL20200046	Parcel 1C070K830022 - After review of the property, assessed values, the valuation model and the market it is the opinion of this appraiser that the assessed value of \$10,162,500 for this parcel does not exceed market value. The land residual approach indicates a land market value of \$15,950,053. Market value indicated by the Assessor's downtown land model if the prime location rate were to be applied would be \$15,243,800. Being a review in response to a Petition for Review I recommend no change to the assessed value for this year.	WITHDRAWN	04/10/2020

Appela withdrawn prior to BOE hearing

APL20190100	04/19/19 per appeal. Site visit 04/04/19. Photos/sketch. Comparison appraisal provided for the purpose of establishing a value ratio between Waterfront and Upland parcels in order to facilitate a land swap w/ CBJ. Substantial site modification is underway, initiation of activity was after to 01/01/19 (building pad in progress near junction with access road). For 2019, access to the site was limited to a steep trail that leads down to beach. Significant topo restricts use of property. Parcel is segmented by a minor drainage that runs adjacent to cabin structure. Revise GLA, lower floor valued as GLA, adjust 2nd level due to height limitation. Upon site review, change lower level to Raised, Enclosed porch. Topo adjustment 100% -> 90%, Wetness 100 -> 95%. Period S/V I/V A/V 2019 Asmt \$387,100 \$70,100 \$457,200 2019 Proposed \$312,600 \$69,100 \$381,700 Proposed valuation accepted by appellant 04/10/19\ al	CLOSE	04/01/2019

APL20180114	04/05/18 Per appeal; reviewed appraisal. Per app seperated org SFR (log cabin) from newer structure for quality, cond, and remodel of baths in new add (this counts for Record 2). Per app, apt in bsmt has been updated also. The flr plan is diverse w/sm kit in main unit which is disproportional w/remaining main liv area. Both the main liv area and log cabin add have 1 bed/bath which is not common for the sq ft, thus the reduction in Qlty from 3.5 to 3 for newer liv area. Per app it is stated that the log cabin "is not the same level of finish or design as the rest of the dwelling. Update Sketch per appraisal and hard file record. Revalued. Reviewed site values. BLD-0450801	OUTSIDE WORK	ISSUED	10/21/1989
APL20220193	We did a site visit on 04/12/2022. Based on that inspection we have applied the following adjustments. 1. The building had significant deferred maintenance prior to the collapse so we have added 1% more of depreciation to bring it to a residual value of \$37,382 based on a 35 year economic life. 2. While the core land valuation is equitable there is an additional adjustment that needs to be applied for the site cleanup. While exact cost-to-cure for the cleanup has not been established we have applied a \$50,000 adjustment. This is based on a smaller residential cleanup typically running from \$15,000 to \$20,000 and this cleanup being somewhat more extensive.	CLOSE	04/06/2022

Chair Epstein noted that Mr. Sams was not present. A letter from Mr. Sams was provided in the packet stating that an increase of value of almost 10% in one year was excessive.

Mr. Sahnaw said that Mr. Sams' property was included in the Lemon Creek assessment area. The property is close to the State DOT property and across the Egan Highway from Sunny Point. The Assessor's Office visited the site and were not asked to visit the inside of the property, which is typical, and the house appears to have adequate or better maintenance. The lot and other lots in that immediate area is larger than typical. The property has a view of the Mendenhall game reserve. The house is assessed by the cost approach with depreciation and the outbuildings have been assessed conservatively. These are older buildings and are not those typically found in a "cookie cutter" neighborhood. His land is valued in the same manner with others, the house in the same way, with an annual market neighborhood adjustment which resulted in a fair market value. Mr. Sams provided the written comments in the packet after he rejected the Assessor's recommendation of no change.

Mr. Gaguine asked the square footage of the house and Mr. Sahnaw said it was 1575 square feet. Mr. Gaguine asked if Mr. Sams was present when the assessors were on site and Mr. Sahnaw said no. Mr. Sahnaw said the assessors offered to do an interior inspection but the offer was not accepted.

Mr. Sahnaw said he looked at the values provided in the neighborhood and said that Mr. Sam's property was lower than others in the area.

Mr. Moseley asked if the value was increased by 10%. Mr. Sahnaw said Mr. Sams' assessed value was increased 8.4%. Mr. Sahnaw explained how property is canvassed, which is the term used for inspecting individual properties from the street. There is a five year cycle to canvass every property in the borough. Mr. Sam's property was canvassed in 2015, after the 2015 assessment, which affected the 2016 assessment. The assessment is based on the data being updated the canvass in 2015 and the market adjustment being applied to that information. A canvass includes going to the property with the property file, reviewing the measurements, account for all buildings on the property, that there has been no removal of buildings and we do a new calculation of replacement cost, which involves new building cost data from Marshall and Swift, and that is depreciated, and all of those canvassed properties values are in the annual ratio study and produces the neighborhood adjustment.

Mr. Moseley said that if there was a case that they are below market value for some time and then a change is made, they could feel it was unfair, but this method seems fair and reasonable.

Mr. Gaguine asked about the age of properties in the area. Mr. Sahnaw said the subject property was estimated to be built in 1944. Mr. Gaguine asked about the depreciation value and Mr. Sahnaw said assumptions are made, especially when no access to the interior is available, that buildings are maintained, and on a roughly 15 year cycle. Major house components are updated, such as bath, roof, siding, etc. Typical depreciation tables are not straight line and reset at a 15 year period. Assuming average treatment, properties have the same amount of depreciation.

MOTION, by Gaguine, to grant the appeal and recommended a "no" vote.

Mr. Gaguine said the assessment seems high, but given that Mr. Sams did not make a presentation and did not allow the assessor into the house, there was no evidence to change the assessment.

Roll call:

Aye:  
 Nay: Epstein, Moseley, Gaguine.  
 Motion failed, the appeal was denied and the assessment stands as noticed.

APL20170378	05.17.2017 PER APPEAL FIELD REVIEW. BUILDING HAS A HYDROLIC ELEVATOR 2500LBS 3 STOPS. NO LAND ADJUSTMENT, SPACE IS A PRIME LOCATION FOR JORDAN CREEK AREA SHOPPING. 06.07.2017 FURTHER REVIEW OF INTERIOR REFLECTS NO UPDATES SINCE BUILT. CALLBACK CHECK FOR FUTURE PERMITTING 06.07.2017 DMHP 05.17.2017 Donna_Prince - 5/17/2017 3:18:21 PM NO LAND ADJ AT THIS TIME. RECOMMEND NC TO SV AT 322500 CHAG IV FROM 1086300 TO 981400 CHAG AV FROM 1408800 TO 1303900.	CLOSE	04/28/2017
APL20190219	Donna_Prince - 6/7/2017 10:41:49 AM PER 2019 APPEAL REVIEW, ADJ FOR LAND SHAPE DUE TO LIMITATIONS IN USE, ADDED 10% FUNCTIONAL OBSOLESCENCE FOR POOR ENTRY TO BUILDING. 2003 BP FOR EXT WALLS AND DOORS. NO VALUE GIVEN FOR ELEVATOR IN 2017. CHG EFF YEAR FROM 1997 TO 1995. CHG SV FRM 395,700 TO 310,500 CHG IV FRM 981,400 TO 864,200 CHG AV FRM 1,377,100 TO 1,174,700	CLOSE	04/16/2019
APL20220240	robin_potter - 4/23/2019 1:16:53 PM Appeal Reason: 1. Excessive 2. Unequal 3. Improper 4. Land has long unusable tail. 5. Limited parking. 6. Difficult access. 7. Front entrance in rear. 8. State ROW condemnation.	WITHDRAWN	04/07/2022
	Findings 1. We find that the value is not excessive. 2. We find that similar methodology was used for these parcels and, therefore, they are not unequal. 3. The methodology utilized was proper. 4. A 20% Shape adjustment was applied plus a 10% Wetness adjustment and a \$30,000 Flood adjustment. 5. We find the parking to be adequate and no additional adjustment necessary. 6. We find the access to be adequate and no additional adjustment necessary. 7. The entrance to the building is right off the parking lot. The front of the building has great exposure to Glacier Hwy. 8. No additional adjustment is warranted from the DOT ROW condemnation.

APL20210008	8/27/2021 Appeal: Reviewed neighboring site values for equity. Parcel is equitable with similar properties in neighborhood. Assessment notice for parcels to the west of subject without trending. Corrected assessment notices were mailed to these properties to bring them into equity. Subject site value is 21.60 per SF parcels to the west site value is 19.80 per SF. Appears equitable when adjustments for frontage are considered. DEC letter regarding contamination was considered. There is no data suggesting DEC restrictions effect value. - GM	CLOSE	04/05/2021

APL20210473	Appellant failed to provide evidence which satisfies the appeal criteria as laid out above. The Assessor Office recommends NO CHANGE to the 2021 assessed value as the appellant failed to meet the burden of proof as required by state statute. The Assessor Office sees no basis for change.	CLOSE	05/06/2021
APL20220260	For the Swampy Acres parcels: Even though the three parcels appealed could easily be sold individually and they do not fit the classic definition of an economic unit, given their predominant use and development, we are willing to treat them as an economic unit. The net result of this is that, taking their D-10 zoning and the neighborhood into consideration, the adjusted price per sf for the land would be \$2.13. The reduction to value is illustrated in the table below. (The fourth parcel, 4B2201020050 would remain treated separately due to the senior exemption.) (Note that these values do not represent full market value but are equitable with our level of assessment for the commercial class of properties.)	CLOSE	04/07/2022

08/14/17 NOTES

per appeal. Site visit 06/09/17. N/C Withdraw

Land

Vacancy Adj @ 30K

Appellant cited a list of issues regarding the parcel which included: Wilma Ave, drainage, water/sewer location, access driveway issues.

Building

n/a

--"Sewer was installed on the Wilma Ave frontage at an elevation that will require fill before obtaining a building permit".

o Contour lines at 10ft elevation indicate parcel has less than a 10% slope for the width of the lot. This is considered level terrain in Juneau.

--Water line is a 3/4" line. Under current code the line will need replacement with a 1" line. Waterline currently runs down middle of lot.

o This is a property owner issue and not considered a land adjustment for mass appraisal purposes.

--An existing driveway crossing the middle of the lot and coming within 2 feet of the NW corner of the house on adjacent property violates the setback.

o This driveway issue is due to the splitting of the original improved lot to create an additional lot. The driveway created the flooding and/or drainage problems as a result of poor development of the lot. Owner created and owner responsible for correcting.

--Water drainage from Wilma Ave and adjacent owned lot drains onto Subject lot which currently has a culvert under driveway to allow flow

o Owner responsible for the drainage problem. Not a wetlands issue.

--Highway noise

o The Subject has frontage on Glacier Highway. All properties located on frontage roads anticipate highway noise at the time of purchase.

-- CBJ does not maintain the Wilma Avenue road

o Wilma Avenue is a private road, not owned or managed by CBJ.

Information on reconsolidation of Lots 5 and 6:

¢ Consolidation of the two lots would increase the total combined lot size to more than 37,000 SF.

¢ The estimated base rate before market adjustments would be less than \$4 PSF or approximately 148K before adding in the market adjustment.

¢ For 2017 the assessed site value would have been approximately \$158,000 v. \$238,300.

¢ The drawback is the loss of potential profit in a resale of one parcel instead of two parcels.

RECOMMENDATION

THE SUBJECT PARCEL IS RECEIVING A \$30,000 VACANT ADJUSTMENT FOR SITE IMPROVEMENTS NEEDED TO OBTAIN A BUILDING PERMIT. 300 CUBIC YARDS OF FILL IN ALASKA IS ESTIMATED TO COST \$30.72 PCY OR \$9,200 WHICH IS CONSIDERED IN THE VACANT ADJUSTMENT. SITE VALUE IS EQUITABLE WITH THE NEIGHBORHOOD AND MARKET ADJUSTMENT IS 8% BELOW FULL AND TRUE VALUE.

APL20160543

Demo of old mobile home and shed  
4B2201070020 10665 Glacier Hwy Appeal #543  
Reason for appeal: My property value is excessive  
Noticed Assessed Value: Land \$115,200 Building \$19,700 Total \$134,900  
Recommended Value: Land \$104,500 Building \$5,500 Total \$110,000  
Difference in value: Land -10,700 Building -14,200 Total -24,900  
Reason for change: Building was brought to 10% of replacement cost new because building has a demo permit. Land value reduced per Robin Potter. August 2015 purchase price was considered due to issues with soil and deed restrictions.

APL20150067	5/19/15 Per appeal: Building was viewed for the exterior. Appellant pointed out broken foundation as a result of significant settling. The site has severe wetness problems. Appellant had a contractor assist in determining the soil condition on the lot. It was estimated that the depth of peat is 12' to 15' over the majority of the site, making redevelopment un-economic. The buildings and the land were re-valued. Changes as follow: Change Site value from 112,100 to 63,000. Change Buildings from 28,600 to 27,000 Change total from 140,700 to 90,000	CLOSE	04/08/2015
