CMR2006-00013	Partial demolition of existing timber deck, stringers and installation of a new steel pile supported reinforced concrete pile cap to support a crane. The new piles and pile cap will be constructed within the footprint of an existing pier. The piles will be 18 inch steel piles which will be driven open ended to an approximate tip elevation of -72.0. The piles will be filled with concrete infill prior to construction of the reinforced concrete pile cap. Electrical service to the crane will be provided by extending the service from the existing on-shore facility. There will be no access roads, care takers facility or waste disposal sites constructed under this project.	CLOSED	10/30/2006

APL20210521	Issue: Parcel has utility easements which greatly minimized utility	CLOSE	05/06/2021
	Action: Utility easements for adjacent parcels are the same as subject (no consideration at this time), Apply VAC ADJ = 30K, significant development costs due to slope. Parcel is now more equitably valued with adjacent neighbors. Consider TOPO ADJ for other parcels in this stretch for 2022 in consideration of sale of similar parcels to the south which were bank owned for many years.

APL20150254	06/25/15 Prev SV was inclusive of farm deferment chg land value 44700 --> 80000\ al	CLOSE	06/24/2015
APL20150274	08/07/15 Site inspection indicated a portion of the property appeared to be fenced or roped off. Much of what was outside the barrier was submerged in water. Comparison to the aerial determined 60% of the property potentially used as pasture, however "fencing" was down in areas and horses or other livestock could not be contained at this time. I am granting the 60% as this may be a temporary situation. Original farm deferment 0 Revised farm deferment 40,800	CLOSE	07/21/2015
	07/21/15 Appeal of Farm deferment value\ al

APL20150275	08/07/15 Site inspection from the covered horse corral structure on the road easement portion of the area, indicated substantial grass pasture type land on this parcel. There was fencing but the gate was absent so containment of livestock would not be possible at this time. There is a portion of the parcel outside the fence being used to park vehicles from the trucking business owned by Mr. Sidney which is non-conforming. I am granting 94% of the property as potential pasture if the gate were in place. Original Farm deferment 0 Revised Farm deferment 107,900	CLOSE	07/21/2015

APL20210475	Appellant failed to provide evidence which satisfies the appeal criteria as laid out above. The Assessor Office recommends NO CHANGE to the 2021 assessed value as the appellant failed to meet the burden of proof as required by state statute. The Assessor Office sees no basis for change.	CLOSE	05/06/2021
APL20220261	For the Swampy Acres parcels: Even though the three parcels appealed could easily be sold individually and they do not fit the classic definition of an economic unit, given their predominant use and development, we are willing to treat them as an economic unit. The net result of this is that, taking their D-10 zoning and the neighborhood into consideration, the adjusted price per sf for the land would be \$2.13. The reduction to value is illustrated in the table below. (The fourth parcel, 4B2201020050 would remain treated separately due to the senior exemption.) (Note that these values do not represent full market value but are equitable with our level of assessment for the commercial class of properties.)	CLOSE	04/07/2022

SUB2004-00029	A Preliminary Plat proposal to subdivide McGinnis 6 Tract C into 28 lots.	APPROVED	08/11/2004
CMR2004-00017	Applicant proposes to construct a 26-lot residential subdivision on a 12-acre tract of land, which would involve discharging approximately 12,747 cubic yards of fill material into 1.98 acres of scrub shrub/emergent wetlands. The existing Steelhead Street would be extended 1,500 feet to the south end of the site and a new side street (Steelhead Court) would extend into the wetland resulting in 0.69 acres of wetland fill for public street development. The remaining 1.29 acres of this wetland fill would result from construction of residential lots in the wetlands, as shown on the attached drawing in the Army Corps of Engineers Public Notice dated December 2, 2004. Approximately 0.23 acres of this wetland fill would be for building pads on lots 9 and 10 and utility lines that would be filled above ground level between the lots. Additional utilities to the other individual lots would be placed in the proposed fill material and would not result in additional wetland impacts. Approximately two feet of muck and organic soil would be excavated from some of the fill areas and placed on an upland area and/or be used in the proposed fill areas.	CLOSED	12/23/2004

MAP2005-00003	This amendment would change the conditions adopted in MAP2003-00002. The change would allow for phased development on the subject lot if the developer meets the following conditions: The developer must reach a binding agreement with ADOT, which guarantees for the installation of a traffic signal at Davis Avenue and Glacier Highway within the 2006 calendar year. The developer shall commit to fund or construct pedestrian improvements for the neighborhood.	APPROVED	03/08/2005

APL20210294	no change	CLOSE	04/29/2021
APL20220113	Summary	CLOSE	03/24/2022
		Here is a summary of the land classifications. These revised classifications basically result in 41,812 sf, slightly under 1 acre, as being identified as the primarily usable area.	
		These adjustments were entered into the following categories in the CAMA system. (Listed in CAMA system order.)	
		" Under Wet - The combined 70% of limited utility land is entered here and therefore no value is attributed to this land.	
		" Under View - This is the positive adjustment for the buffering , pond and greenbelt influence that the limited use land provides. Due to the compounding that occurs within the CAMA system calculations, entering 1.20 results in a 6% increase for these attributes.	
BLD20220506	Placement of Pucker Wilsons with drive through - no grading at this time	ISSUED	07/20/2022

<b>GREENWOOD AVE</b>			
<b>7B0901040164</b>			
APL20150009	Per appeal. Spoke with owner/developer. Site is vacant. Large site is extremely steep to the north and south, but roughly 20,000 SF of the site is likely developable. A hypothetical 20,000 SF vacant lot in this nbhd would be valued at \$144,200. The subject site would require more extensive dirt work to be viable as a homesite. The site is adjusted at 65% good overall (topo) with an additional 60K for site prep.	CLOSE	04/01/2015

<b>GREENWOOD AVE</b>			
<b>7B0901080040</b>			
APL20150008	Per appeal: There is no improvemnt. Removed Building value. Land Base value is 104,300. Site has a filled pad. Reviewed aerial photo and 2008 site fill/grading plan. Roughly half the site is too steep to develop further. Topo adjustment of 75% good (50% of site is only 50% good). According to the appellant, a consulting contractor estimated the cost to construct a needed retaining wall would be in the range of \$40K. the appellant, a developer, estimates the site to be worth \$65K, as it is not developable in its current state. A Cost-to-cure adjustment is applied for a portion of the cost of the retaining wall. Change site value from 82,458 to 65,000. Change Bldg value from 1,629 to 0. Change AV from 84,087 to 65,000. jcs	CLOSE	04/01/2015

APL20200241	7/2/2020 Appeal: Reviewed interior pictures, site visit, engineers report about 200 year flood event. Yard erosion due to flood event in 2019, partly mitigated with rock. Appellant states wetness in basement apartment consistent after heavy rains due to storm drain damage. Reviewed claim with Jennifer Mannix who stated the storm drain is newer plastic pipe, not nearly old enough for failing. CBJ does not accept liability of storm event that damaged property. Confirmed BSE with appellant. EYB 2002 > 2000, remove front deck, applied 5% functional for foundation leaking water in basement apt. Revalue - GM AV: Site: \$145,400 Improvements: \$276,600 Total: \$422,000 NV: Site: \$145,400 Improvements: \$247,900 Total: \$393,300 Proposed correction accepted by appellant via email 7/14/2020	CLOSE	05/05/2020
APL20220249	5/2/2022 Appeal: Reviewed ongoing flooding issues with appellant. 3 major flooding incidences have happened in last few years. Recent flood 1/11/22 caused water damage to 1st floor. Owner attempted to mitigate hill damage from flooding with rock, but only able to secure bottom of hill due to cost. To follow up in 2023 about state of repairs. Changed functional obsolescence from 5% to 10% due to need for flood mitigation, further need to armor hillside against erosion and repair erosion sites, and continued leaking foundation into 1st floor. AV:\$ 447,900 NV: \$427,700	CLOSE	04/07/2022

APL20160236	Purchased at Foreclosure auction for \$227K. On-site inspection and spoke with owner. Much of the building has been stripped to open studs. The remainder will likely require additional demolition and substantial repair before walls, flooring, cabinets, appliances, fixtures and fittings are installed. Analyzed as a new construction project, with additional consideration given for needed demolition and the challenges of retrofit construction, I estimate 60% of the "as-completed" RCNLD as a cost-to-cure. This results in a current value of \$230,700. N/C to Land at 98,700 Chg Bldg from 401,000 to 132,000 Chg AV from 499,700 to 230,700	CLOSE	04/07/2016
