I would like to propose that we consider using funding from the fees to partially pay for installing a backup generator at Centennial Hall. Centennial Hall, as you know, is the primary shelter location for Juneau and has been used several times in the past specifically to shelter cruise ship passengers. In the event of a power failure at a time when the facility is in use as a shelter, passengers would potentially have to be relocated to structures with power. This would be a transportation issue primarily because there is no single facility that could accommodate the same number of people as Centennial Hall.

Mike

Let no one say "They should have been better prepared."
