MEMORANDUM

TO: Airport Board of Directors

FROM: Jeannie Johnson
Airport Manager 

RE: New Ordinance Prohibiting Smoking on Public Side (Front Curb) of the Airport Terminal

DATE: December 7, 2012

The Airport has now installed 2 new very nice smoking shelters, one on the West end of the terminal and one on the East.

There is an existing CBJ Ordinance that prohibits smoking in public buildings and within 10 feet of an entrance. A \$50 fine can be imposed for violation.

As you know, the entire public side of the terminal is curb and sidewalk. One of the recurring complaints we receive is about people smoking within the area along the front of the building and the new covered "tour bus shelter".

There are numerous entrances to the building. As it stands right now, as long as someone is 10 feet on either side of the entry doors it is legal for them to smoke. We have asked many times for folks not to smoke along the front of the terminal but we have no way to enforce our request.

The goal is to prevent smoking from the curb to the building and anywhere in front of the new "tour bus shelter" except in designated smoking areas which are our new smoking shelters.

The recommendation from City Attorney John Hartle is for the Airport to have an ordinance so we can enforce the specific needs of the Airport.

The first step in this process is for the Airport Board to approve the policy so I can engage the Law Department in drafting the Ordinance for Assembly approval.
