## INFORMATION RELEASE

**Subject: Excellence in Technology Award**

**Date: September 5, 2007**

**From: Cindee Brown-Mills**

**Case or Incident # N/A**

### **Summary:**

The International Association of Chief's of Police (IACP) recently announced that the Juneau Police Department will be awarded the iXP Excellence in Technology Award for Innovation in Information Technology for the implementation of the Digital Evidence Locker™ developed by Justice Data Group, Inc.

The 'Digital Evidence Locker' is a software solution that provides secure access to audio, video, photographs and documents for staff and our Justice partners, ensures safe storage, and maintains the integrity of digital evidence. Interoperability with the department's Records Management System (RMS) and digital in-car video data allows seamless case-management of this evidence for our officers.

The IACP is an international organization that has an active membership of chiefs and superintendents of police as well as command- and administrative-level police officers in public law enforcement agencies. The technology awards program is open to local, tribal, state, provincial, federal, and multi-jurisdictional law enforcement agencies from around the world. See <http://www.iacptechnology.org/TechAwardWinners2007.html>

Winners were notified August 21, 2007. The winning agency for each category will receive a plaque and complimentary registration to the IACP Annual Conference on October 13-17, 2007 in New Orleans, Louisiana. During the conference the winning agencies will have an opportunity to present their projects in a Technology Institute Workshop.

**Any charges reported in this press release are merely accusations and the defendants are presumed innocent unless and until proven guilty.**
