Total Bid: Furnish all labor, equipment and materials for replacement of two existing chain-link entry gates at the Hagevig Fire Training Center (FTC) and the Juneau Police Department (JPD). Both require removal of existing gates and components. The JPD gate requires removal of the electrical power with the control connections to the existing gate operator equipment and reconnecting both to the new gate operator equipment. The FTC project consists of providing new power and controls to the new gate operator. This will include trenching, new buried conduits, connecting these conduits within the building to power and data sources. Both gate locations will require coordination with the building users, IT and telephone interface, plus testing and training, and other miscellaneous WORK, and perform all WORK as described in the Contract Documents.
