Item No. 1 1.0 GENERAL INFORMATION, 1.2 – Scope of Services. **Delete** in its entirety, and **Replace** with:

“1.2 Scope of Services

The Consultant shall provide all necessary engineering, surveying and design services to prepare complete, bid-ready construction drawings, specifications, bid schedule and engineers estimate for construction. The design work shall include improvements to the road base and paving of the gravel and chip seal road surface. Additional potential project amenities may be added including sidewalk and curb and gutter, if the L.I.D. is approved and the project proceeds forward.

The project is anticipated to be completed in multiple phases due to size, site configuration and funding constraints. The initial phase will include but not be limited to:

- Topographic survey to determine drainage patterns
- Preliminary design / preparation of typical sections for presentation at neighborhood meeting.
- Preparation of preferred sections for presentation to the Planning Commission.

- Preparation of bid ready construction documents for a first phase that will fit within available funds.

The CBJ may elect, upon the Consultants satisfactory completion of prior phase, to amend the scope of services to include design services for future phases of this project.”
