---

Can we have some representatives of labor on this Economic Stabilization Task Force? The names posted on the CBJ Facebook page as participants are all government workers, business owners, or managers. We need representation from all sectors. Unions and employee associations need a place at the table.

We don't want just businesses and employers to thrive in the new economy. We want workers to have living wages, reliable scheduling, sick leave, and health care. Many workers are denied these rights. Many corporations take their profits outside of Juneau, leaving local residents without adequate resources for a decent life, despite working full-time.
