Hello,

I have been thinking of how Juneau is going to survive the second wave of financial hardship come END of season. All the locals that normally work summer positions or take a second job in the summer will most likely not have that extra income this year. This turns into less Local revenue during our Slow months ( October, November, December, January). That income will be missed by many local businesses and could be the nail in the coffin as many of our loans may have run out by then. What can we do As local businesses to increase local traffic in those slow months if the locals don't have the discretionary funds to spend?

Warmly,  
V
