

## Flying Raven Craft

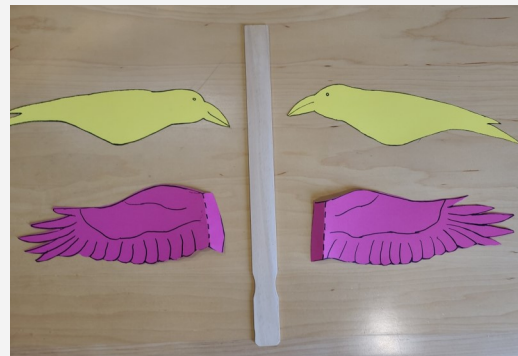

**Supplies** Available for pick up June 18 or print your own using templates provided

JPL provides: 2 wings, 2 bird bodies, 1 glue stick, scissors, 1 paint stick (thank you Valley Paint Center!)

You provide: Scissors

Step 1: Cut out wings and bird bodies

(If you print this activity on blank paper, you may wish to color in your raven pieces first)

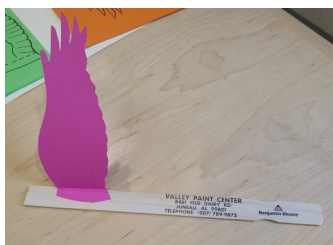

Step 2: Fold both wings under on the dotted line

Step 3: Look at wing, smooth curved edge is front of bird

Step 4: Glue wings on bent flap below the dotted line. Glue to paint stick 1-2 inches from end of stick on end opposite the handle

Step 5: Lift one wing up, glue bird body with beak facing forward

Step 6: Glue second bird body on other side of paint stick, so head and beaks line up

Step 7: Fly your raven by bobbing paint stick up and down

Congratulations, you've completed this week's craft!
