WILDLIFE LOG INSTRUCTIONS

DATE: The date on which your shift began.

TIME: Military time (00:00 – 23:59).

LOCATION: Give the grid position where the activity is located, not where you dispersed it from.

#: Number of species observed or dispersed.

SPECIES: List each one separately. Multiple species of the same are to be entered on separate lines.

ACTION: Enter the action taken. Vehicle Harassed, Cracker shells, Pyrotechnics, Physical Harassment, S

#K: Number of species killed. The #K must EQUAL the quantity put for Count # column.

BEHAVIOR: None, bedding, roosting, loafing, foraging, flying, courtship, nesting, denning.

COVER TYPE: Enter the cover type even if the birds are not physically on the ground, as this aids in identifying location within the grid. Only these listed can be used: runway, taxiway, ramp, asphalt, unpaved road, gravel, structure, ditch, short grass, long grass, shrubs, woodland, marsh/wetland, creek/stream, temporary standing water, large water body, small water body, high tide, low tide.

AMMO: Cracker shell, 15mm banger, 15mm screamer, 18mm CAPA, air rifle pellet, rim fire cartridge, center fire cartridge, shot shell, paintball.

OF ROUNDS: Record number of rounds of ammunition used each action.

COMMENTS: Record results of action taken (which direction they flew, where they landed, or any other behaviors). These codes can be used in place of complete writing: DLA- did not leave area; ON, OFF, MOVED- static equipment changes; N,S,E,W- directions
