Date of Collection: March 10, 2022
Sampling Location: Juneau, Alaska

Summary

Five samples from the Juneau International Airport were received at Admiralty Environmental, Juneau, AK on March 10, 2022.

The samples were analyzed for biochemical oxygen demand, chemical oxygen demand, ammonia, and pH. The parameter of pH was received past holding time. All other laboratory acceptance criteria were met for all samples.

A complete report of the final lab results is enclosed. The official laboratory report follows this letter, and includes the analytical results, case narrative, chain of custody form, and cooler receipt form.
