I'm appalled with the black smoke billowing from ships as they leave port. Clean air belongs to all of us. The cruise industry in Juneau is out of control brought down to more reasonable numbers. Especially looking at two new private docks, our summers will become even more crowded for local residents on the land, on the water, and with planes and helicopters flying overhead.

Please bring back some sanity for local residents and reduce the number of ships and visitors that can be in port at one time and tax them for the services they use and impact while they are in town.

Linda Kruger
