

Juneau International Airport EVAR/Dike Trail closure

Publish: August 12, 2026

Juneau International Airport (JNU)'s Emergency Vehicle Access Road (EVAR), commonly known as the Airport Dike Trail, will close when the Juneau Glacial Lake Outburst Flood (GLOF) Unified Command announces that Suicide Basin is beginning to release. The Airport anticipates that the trail will remain closed until the flood has cleared Mendenhall River and JNU has confirmed that the trail is safe. JNU will alert the public when the trail reopens.
