Dear CBJ,

I would like to voice my concerns about the draft recommendation #13 in front of the city. I have lived out Thane Rd for over 40 years so have traveled this area for a long time. With the increase in all the tourism over the years I feel that we have plenty of optional crosswalks for the summer season now. Adding another crosswalk to the proposed area will create way too many stops for vehicles transiting that area. Since there are TWO crosswalks on either side of Main Street and another one at Marine Way then again at the library, people have plenty of options on crossing the street. The crossing guards have been a lifesaver for us recently and this past year are communicating with each other much better so that traffic is stopped for a more reasonable time frame. I would suggest that if they felt like that area was an issue for tourists then some sort of signage that would direct them to the next closest crosswalk might be an option. Since Wings uses that area to back out of their spot at Merchants Wharf to transport their clients that area already has plenty of obstacles to deal with and it tends to be kind a blind, tight corner if you are going south along that area. It gets backed up at the light long enough already without another stop.

Thank you for considering my recommendations.

Pam Woolcott
